DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alpdemir in view of Hayman et al.

Alpdemir teaches a speech-interactive information system including a speech-to-text conversion engine converting speech-based input commands and data received from an external device over a communication link into text-based commands and data; a data base storing a plurality of data items; a database search engine searching the database for a particular data item in response to the text-based command and data; a text-to-speech conversion engine generating a speech-based representation of the particular data item identified in the database search; and a speech server for communicating the speech-based representation of the particular data item to the external device (see column 2, line 65 through column 3, line 9).

Alpdemir does not teach the a point of sale register in a restaurant, used by food preparers.

Hayman et al. teaches a restaurant video display system including the routing of food orders from a POS to a food preparer station. (see for example column 1, line 65 through column 2, line 1).

Art Unit: 3627

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the teachings of Alpdemir for use in a restaurant for processing food preparation orders as taught by Hayman. One of ordinary skill in the art would have been motivated to modify the references in order to expedite the food preparation process.
